EDUCATION

University of Wisconsin – Green Bay – Green Bay, WI Bachelor of Science Degree

May 2022 | GPA 3.61/4.00

Double Major in Computer Science and Information Sciences

- Emphases in Software Engineering and Game Studies.

RELATED EXPERIENCE

TEKsystems – Ashwaubenon, WI ~ Contract Software Support Technician (Temporary) @ Greatland

December 2023 – March 2024

- Resolved customer tech issues for form inquiries, Excel imports, SQL errors and installation errors for a business tax software.
- Applied resources like Salesforce, team members, previous experience, and the knowledge base to determine solutions and guide customer calls appropriately and professionally.

Fifth Wave Solutions LLC – Milwaukee, WI ~ Remote Freelance Web Developer

December 2023 – January 2024

- Integrated the OpenAI API to create a tailored, mobile friendly user experience for crafting and enhancing speeches.
- Interpreted project requirements and organized the application's structure to independently develop a customized business website.

Green Bay Packaging Inc. – Green Bay, WI Software Engineer Intern

August 2021 – May 2022

- Trained under lead developers to understand technical solutions, business requirements, development standards, technical tooling, and SDLC best practices.
- Implemented and validated code changes to a four-year-old web application with an abstracted .NET Core architecture.
- Followed agile scrum methodology by sharing and learning from daily scrums, weekly sprint planning and backlog grooming, and biweekly retrospective meetings.

Ashwaubenon School District – Ashwaubenon, WI I.T. Summer Help (Temporary)

June 2021 – August 2021

- Efficiently transported, assembled, imaged, updated, and wiped computer devices and hardware.

SKILLS

- ☑ Well experienced in C#, Unity, React, TypeScript, JavaScript, ASP.NET Core, TSQL, and GitHub.
- ☑ Moderately experienced in Java, C++, Python, HTML 5, and CSS.
- ☑ Familiar with Unreal Engine, Godot, C, Azure DevOps, and Android Studio.

FEATURED PROJECTS

Cover Letter Wizard

A cover letter creation and modification tool that uses ChatGPT 4 to guide the user through a series of questions for creating stunning cover letters. Acquired familiarity with the OpenAI API along with web framework experience (React, Node.js, TypeScript).

Filterify

A web tool for enhanced song filtering and exporting using the Spotify API. Learned more about API integration, web framework (React, Node.js, JavaScript, TypeScript), and data mapping.

ACTIVITIES

Game Jam Participant

October 2022; February, July, November 2023; January 2024

- Collaborated in developing **functional** game demos in a short timespan based on a given theme.

Experienced Build Volunteer, Greater Green Bay Habitat for Humanity

July 2022 – December 2023

- Partnered with community volunteers in constructing quality homes for families in need.
